

# High Pressure Water Jetting

**Reducing downtime.  
Minimal environmental impact.**

We know that without the right equipment, cleaning industrial machinery and facilities can delay or interrupt your operations. At Veolia we use best-of-breed pumps, accessories and robotic techniques for the safe provision of all of your high and ultra-high pressure water jetting needs, with minimal environmental effects.

**INDUSTRIAL SERVICES**

## HIGH PRESSURE WATER JETTING

No matter what heavy industry you are in, high pressure water jetting or high pressure water blasting is an efficient, cost-effective and environmentally friendly part of any industrial plant or industrial equipment cleaning toolkit. It has many applications, including surface preparation and cleaning, pipe and tank cleaning, pathways and roads, concrete demolition in no-fire zones, cold cutting of steelwork, and scale, paint and rust removal.

Veolia has access to the largest high & ultra-high pressure water cleaners available in Australia and New Zealand, ranging in horsepower from 70 to 750 HP. We also utilise state-of-the-art cleaning attachments, including spinning nozzles, rotary multi-jet head pipe cleaning attachments, tank cleaning heads, floor cleaners and automatic internal and external exchanger tube bundle cleaners.

### COMMON APPLICATIONS

As part of our commitment to providing high quality water jetting services that are safe fast, efficient and effective, with zero or minimal environmental effects, we ensure our team is highly trained and experienced, with extensive knowledge in high-pressure water blasting across a variety of industries, big and small.

MANUFACTURING	OIL & GAS / PETRO-CHEMICAL
<ul style="list-style-type: none"><li>• Scrubbers</li><li>• Process sewers</li><li>• Pipelines</li><li>• Air heaters</li></ul>	<ul style="list-style-type: none"><li>• Heat exchangers</li><li>• Fin fan condensers</li><li>• Columns/ towers</li><li>• Vessels/ drums</li></ul>
UTILITIES	OTHER
<ul style="list-style-type: none"><li>• Digester tanks</li><li>• Concrete scabbing &amp; cutting</li><li>• Drainage systems</li><li>• Boiler tubes</li></ul>	<ul style="list-style-type: none"><li>• Floors</li><li>• Paths, driveways &amp; paving</li><li>• Buildings</li><li>• Plant degreasing</li></ul>

### BENEFITS

- **Increased workplace safety** – Services are delivered at the highest safety standards.
- **Downtime is minimised** - The latest in technology and our highly trained operators deliver improved cleaning times.
- **Improved efficiency** - Keeping equipment clean and contaminant free ensures optimal operating conditions.
- **Minimal environment impact** - Reducing the waste generated as part of the cleaning process.
