

# Project Benefits

## Bringing jobs to regional NSW

**300**  
jobs during construction

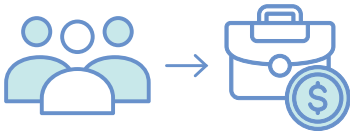

**40**  
jobs during operations

Veolia will continue to recruit locally where possible with

**383**

indirect jobs created through spending with local suppliers and businesses

**70%**

of the construction workforce expected to come from local area

**90%**

of Veolia's current Woodlawn workforce live locally

## Delivering a circular economy

**380,000**

tonnes of waste diverted from landfill every year

**30MW**

of electricity generated, enough to power 40,000 homes a year

**96%**

of the waste diverted from landfill will instead be recovered or recycled

# Project Benefits

## Boosting the local economy

**\$600m**  
capital investment  
to build the ARC

**Further \$2b**

will be spent on operations and maintenance over the **life of the project**

**\$227m**

annual boost to regional economy from **spending with local suppliers during construction** (i.e. building materials, transport, catering, security)

Veolia has committed to spending locally wherever possible

**\$37m**

annual boost to the regional economy from **spending in local shops and businesses during operation**. (i.e. pubs, hotels, restaurants, supermarkets etc)

**\$45m**

annual boost to household incomes in the region during construction. **\$7m** annual boost during operation

## Delivering a circular economy

Enough metal recycled to produce **380,000 bicycles** every year

**100%**

of the bottom ash will be recycled into road base once the facility is optimised, enough to rebuild the road from **Tarago to Goulburn (58km)** every year

**74,000 tonnes**

of greenhouse gas emissions avoided, equivalent to removing **32,400 cars** from the road
