

NATURAL ASSET MANAGEMENT SERVICES AND SOLUTIONS

Businesses and Industry have important environmental objectives and responsibilities when it comes to land, ecological and natural resource management. In particular, municipal and industrial water, local government and the resource sectors routinely require nature based services to continuously maintain compliance whilst creating a positive ecological difference.

At Veolia Australia and New Zealand we provide bespoke and innovative services to deliver cost-effective solutions across the natural asset lifecycle. This is aimed at supporting the three lines of defense, for risk and compliance around land and vegetation management.

FEATURES AND BENEFITS

- Maintaining land and vegetation risk and compliance
- Management of land and habitat rehabilitation
- Management of invasive species
- Remote inspections and assessments of natural assets
- Flexible and innovative options for land and ecological compliance
- Solutions and services for carbon reduction and offset
- Smart services for natural asset management
- A broader, expansive and rapid set of services to existing Veolia capabilities
