

CARBON REDUCTION PROJECTS

Unlock your decarbonisation potential and achieve measurable results

On-site energy and carbon reduction projects are widely acknowledged as the initial step towards lowering emissions.

These initiatives deliver solutions that enable you to start hitting your decarbonisation targets and advance your success as you progress along your carbon reduction roadmap. With a strong legacy in engineering and implementing such solutions, Veolia's extensive organisational expertise enables us to guarantee outcomes. We are committed to financially compensating if we fail to meet the agreed targets.

FEATURES AND BENEFITS

- **Commence your carbon reduction journey** with the support of our ongoing guidance and services
- **Assurance of measurable outcomes** with our performance guarantee
- **Tried-and-tested strategies, tailored to your needs** are implemented to maximise energy efficiency and cost savings
- **Continuous monitoring and optimisation** ensure sustained energy performance over time
- **Demonstrate your commitment** to sustainability and social responsibility through tangible actions
- **Eliminate the need for multiple contractors** with Veolia's end-to-end capabilities ensuring seamless project execution

Government**

SOLUTIONS & SERVICES

Veolia delivers energy-focussed carbon reduction projects with a tangible and guaranteed outcome. We will design, construct, and monitor these retrofit projects to meet your goals. We also take an ongoing measurement approach which is critical to developing carbon reduction projects. Once you're armed with this data you can take a pragmatic approach to your capital spend.

CASE STUDY: MID NORTH COAST LOCAL HEALTH DISTRICT

Project Overview: Multifaceted energy efficiency project to reduce carbon footprint in healthcare.

Challenge: Hospitals have high energy requirements and finding a solution to be more efficient and reduce emissions while protecting the sensitivities involved in medical practice can be complex.

Solution: Veolia delivered an Energy Performance Contract to Mid North Coast hospitals by implementing energy conservation measures and sustainable engineering designs across 11 hospitals. This included photovoltaic solar systems and HVAC system installations and upgrades.

Benefit: The upgrades and installations have resulted in a greater energy self-sufficiency as well as optimised systems.

Mid North Coast will save \$20M in costs over 15 years and avoid 3,900 tonnes of carbon emissions every year. This contract helped Mid North Coast to align with the NSW government's Energy Efficiency plans.

GLOBAL KNOWLEDGE. LOCAL EXPERTISE.

Veolia is a global leader in environmental services, operating across five continents with nearly 220,000 employees worldwide. The company is at the forefront of ecological transformation, designing and implementing practical solutions for the management of water, waste, and energy resources.

Through its three complementary activities – **energy, water, and waste management** – Veolia plays a crucial role in developing access to resources, preserving available resources, and renewing them. With a strong commitment to sustainability and environmental stewardship, Veolia is a trusted partner for organisations seeking to reduce their environmental footprint, improve resource efficiency, and contribute to a more sustainable future.
